

Supplement 1. Participant satisfaction

This is what I felt during the intravenous injection. Among intravenous injections, please mark the answer that matches your opinion.

		Strongly Disagree	Disagree	Average	Agree	Strongly Agree
1	Injection pain was reduced compared to the previous injection.					
2	The next time I get the same injection, I will use the M-TEE tourniquet.					
3	I will also use the M-TEE tourniquet next time I get another injection (vaccination, etc.).					
4	I am satisfied with using the M-TEE tourniquet.					
5	I would recommend M-TEE Tourniquet to others.					
6	Stress decreased when receiving intravenous injections.					
7	M-TEE tourniquet is helpful for use in people with poor blood vessels.					
8	I would use the M-TEE tourniquet again even if it costs extra.					
9	I will speak positively to others about the M-TEE tourniquet.
